EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Theodore Holmberg on 10 January 2005.

The application has been amended as follows:

Cancel claims 47-62.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: In combination with the claimed subject matter, the prior art does not teach or fairly suggest initializing a phicon by presenting it to a phicon-reading appliance, extracting a resource identifier, contacting a provider server, and creating a network object at the network location identified by the resource identifier. The closest prior art, U.S. Patent No. 6,542,296 (Rhoads), teaches presenting a phicon to a phicon-reading appliance, extracting a resource identifier, and contacting a provider server after a network object has already been created by the phicon provider.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
